(54) Title: IMPROVEMENTS IN OR RELATING TO AN AIR-BAG ARRANGEMENT

**WO 03/104046 A1**

(57) Abstract: An air-bag arrangement includes an air-bag (1) and a gas generator (6) to supply gas to inflate the air-bag. The gas generator (6) is hingedly (10) connected to a support (4) and is hingedly movable between a closed position in which the gas generator (6) extends across and closes an aperture and an open position in which the gas generator (6) is opened to permit the flow of gas from the air-bag (1). The gas generator (6) is initially retained in position by a retainer (11) the retainer being actuatable, in response to a signal, to enable the gas generator (6) to move hingedly to the open position.
